

Haseeb

Today, I am seeking to be elected as head boy for this year. As an intelligent student, with three years at school, I believe I have the experience needed for this position. Moreover, I have brilliant ideas and great abilities which would make me a perfect part of the PLT (Pupil Leadership Team).

Now I will outline my policies which include learning, school life and links with other communities. I hope at the end of my speech you will support me.

My policies on learning are to make learning fun and add more play-times. I will make learning fun and more enjoyable – because of Covid we all missed learning and we need to catch up. More play-time is needed because children are getting more tired.

Also, as head boy I will add two more hours to PE each week in the curriculum. This includes baseball, more gymnastics, football and basketball. These activities will make your child's muscles grow and this should help their concentration. PE is important for our physical health and also allows us to experience a wide range of sports.

My policies on school life are to introduce a social club and a homework club. A social club helps, for example, if someone is deaf, we can build a social club and they shall succeed. Homework club will help your child learn and will help you as you can do all the chores.

My policies on links to the community are that we can link with other schools and build a proper car park. If we link schools, we will have more space and more activities to do. A proper car park will help cars park.

The good things are you can get more friends.

Finally, if you vote for me,

I will make school a better space.
